

*In the Specification*

Please replace the paragraph beginning at page 109, line 13, with the following rewritten paragraph:

--1. Referring to Figure 10 ~~and Figure~~, a user clicks the "New..." button in the QuickPlace action bar 378 (Figure 7). The "New..." scene 408 appears with a list 412 of available page types. In addition to the old choices (Page, Imported Page, Calendar Page, etc.) each Office or SmartSuite application installed on the user's local machine will be listed with a radio button. The user will know right away which applications can be used for editing - and won't be mislead into trying to use Office and SmartSuite applications they don't have on their machine.--.

Please replace the paragraph beginning at page 156, line 24, with the following rewritten paragraph:

--These functions are very handy to perform checks or changes while loading forms or publishing pages based on forms. They can be adapted to perform whatever check is needed for ~~a forms~~ a form.--.
